Start Guide

1. Bluetooth pair

Open the charging compartment, remove the earphones, the headset will automatically turn on and pair, the matching process takes about 5 seconds (the indicator light is: the headset is red and blue alternately flashing quickly, after the successful pairing, the red and blue lights flash slowly).

Find the corresponding Bluetooth name A5-TWS from the Bluetooth list of the mobile phone and click pairing. The voice prompt connection is successful in about 5 seconds. The headphone indicator flashes blue light every 5 seconds.

When using one ear, just take one of the headphones, select A5-TWS from the Bluetooth list of the phone and click Pair. After the pairing is successful, you can use it.

Touching function area

2. Charging indication

When the charging compartment is charged, the current battery level is displayed, and when it is charged to 100, it indicates that it is full.

The earphone is placed in the charging compartment, and the charging compartment button is pressed to charge the earphone. At this time, the red light of the charging compartment and earphone is always on, after charging, the charging compartment and the earphone light are off.

3.ON/OFF

The earphone is placed in the charging compartment, and after the charging compartment button is pressed, the earphone automatically turn off and charges.

After the earphone is taken out of the charging compartment, it will automatically turn on, and long touch function area will be turned off for 4 seconds; after turn off, long touch the function area again for 3 seconds will be turned on.

4.Call

After the earphone is connected to the phone, you can make a call. When receiving a call, the voice prompts the caller number. Touch the headset function area to answer the call, long touch will reject the call.

During a call, touch the function area to hang up.

5.Music

When playing Bluetooth music, tap the function area, the music pauses, and tap again to continue playing music. Touch the function area twice in succession: the left ear is the volume minus, and the right ear is the volume plus. Tap the function area three times in succession to call back the last call number.

Long touch the function area for two seconds, after the "beep" sound is heard, release: the left ear is playing the previous song, and the right ear is playing the next song.

Precautions for use

1. Headphones should be stored in a dry and ventilated environment to avoid contact with oil, water vapor, steam, moisture and dust, so as not to affect product performance.
2. Avoid using irritating, organic solvents or items containing these ingredients to clean the headphones.
3. The earphones should be correctly and professionally used according to the requirements. Pay attention to the influence of the use environment on the headphones. To ensure the smooth connection, it is recommended that the distance between the mobile phone and the earphones be within 10 meters.
4. If the headset is not connected or the communication is not smooth, etc., please do not disassemble the headset body and its accessories, otherwise it will not be guaranteed.
5. Charge the earphone compartment, please use the standard car charger or the charger specified by the company.
6. To ensure that you use the headset normally, make sure that the headset is fully charged.

Tips 1:

When a earphone is connected to Bluetooth, the other earphone is not enabled by default. For binaural use, please delete the paired Bluetooth device and turn off the Bluetooth on the phone, and put the two headphones into the charging compartment, then take out at the same time, wait for about 5 seconds, the headset will automatically turn on and pair. Please turn on the bluetooth at that time, find the corresponding Bluetooth device, click pair to use. Long touch for 10 seconds, restore the headset to factory settings.

Tips2:

After receiving the powerbank for the first time, you need to completely empty the battery to a digital display of 0 (the battery display is inaccurate because battery at the factory is virtual), Then charge the powerbank to the digital display to 100 (can not be disconnected during the charging process); follow the above steps to fully charge and discharge cycle more than three times, the digital display of the charging treasure can achieve the best accurate display effect.
